12:55:00 GMT Ramdas  
Biradar: Java Programming  
- system. In  
multiprogramming  
operating systems many  
processes are loaded into  
memory for execution and  
these processes are sharing  
the CPU and other  
resources of computer  
system. Scheduler is a  
program that decides which  
program will execute next  
at the CPU or which  
program will be loaded into  
memory for execution. T.  
Y. B. Sc. (Computer  
Science) -  
SpaceCompTutorials -  
Technical system: With the  
advent of latest technology  
if we do not update our  
system then our business  
result in losses gradually  
with time. The technical  
systems contains the tools  
of latest trend i.e.  
computers printers, fax,  
Internet etc. The systems  
with this technology are  
very fast, accurate,  
user-friendly and reliable..
